

HOW TO: CUT THE COST OF ENERGY BILLS USING VICTORIAN ENERGY COMPARE

Victorian Energy Compare is a free and independent Victorian Government website that allows your business and residence to compare its current pricing on electricity, gas and solar in a few minutes.

It's important to compare your energy bills and pricing every 6-12 months to make sure you get the most competitive price.

A recent government analysis found that on average, small businesses are saving up to **\$1100 per year** after using this tool to choose new providers.

What to prepare

To complete a comparison, you will need:

- Your latest electricity / energy bill
- NMI number (your national meter identifier, found on your electricity bill)
- Multiple gas bills (if you use gas)

At least 12 months of billing data is required for the best analysis.

Get your comparison

Visit the Victorian Energy Compare website to start. This is a **no obligation** service.
